Lead diameter	3.8 mm	
Available assortment	2030002 with grease, 2030001 grease free	
Target group	artists, hobby artists	
General attributes	<p>The LYRA red chalk pencil belongs to the group of monochrome chalks offering a particular application for the artist and leisure painter. As a classic coloured drawaing pencil the red chalk pencil has made its place in painting since Leonardo da Vinci. The grease free red chalk pencil can be wiped and of course must be protected with a fixative. It is particulary suitable in the painting of potraits to achieve shades and lay overs. The stump or kneaded eraser allows further shading. Rough drawing paper is most suitable and can be assisted by the right colour of the paper to work as back ground. The pencil no. 2030002 containing grease does not require fixatives and is ideal for studies from the nude or paintings of landscapes. The pencil no. 2030001 is particularly suitable for sketching when travelling.</p>
